1. AGI 400 M/MHB series

1.1 About the touchscreens

The DEIF AGI 400 M/MHB series of touchscreens are industrial-grade panel displays designed for applications requiring robust performance and durability. They are often used in harsh environments like marine vessels, offshore installations and in stationary installations.

Compared to the 400 series, the 400 M series introduces a new 64-bit Quad core CPU for higher graphical performance. The 400 MHB series also has optical bonding and higher brightness to cope with demanding climatic outdoor installations.

The touchscreens connect to all DEIF controllers and third-party electronics using standard communication protocols. They provide a wide range of functionalities that eliminate the need for other instruments, saving space and wiring.

НМІ

AGI model	Screen size	Resolution	Touchscreen	Brightness
407 M	7"	800 x 480 pixel	True glass projected capacitive, multi-touch	500 cd/m ²
410 M	10.1"	1280 x 800 pixel	True glass projected capacitive, multi-touch	500 cd/m^2
415 M	15.6"	1366 x 768 pixel	True glass projected capacitive, multi-touch.	400 cd/m ²
415 MHB	15.6"	1920 x 1080 pixel	Optical bonding. True glass projected capacitive, multi-touch.	700 cd/m ²
421 M	21.5"	1920 x 1080 pixel	True glass projected capacitive, multi-touch	300 cd/m ²

For all models, the display LED backlight is dimmable to 0% and has a timeout option for extensive LED durability.

Interface

AGI model		USB Host (2.0) ports	Serial ports	CAN ports	Expandable storage	Expansion slot
All models	3	2	1 - RS-232/422/485	Optional plug-in module (CAN/ CANopen/J1939)	SD card slot	2

NOTE *With individual MAC address with bridge option.

In-built buzzer

All models have an in-built buzzer.

Mounting depth

AGI Model	Mounting depth
407 M	47 mm
410 M, 415 M, 415 MHB and 421 M	56 mm

Dedicated HMI solutions

- Visualisation and active control in multiple applications on board maritime vessels and platforms.
- · Advanced programming software.
- Full graphical overviews and user-friendly touchscreens.

DATA SHEET 4921240679A EN Page 3 of 26

• High-quality display, easily readable at sharp angles.

Flexible monitoring and control

- Monitor and control multiple setups at the same time.
- Share data using Ethernet and serial connections, effectively enabling the DEIF HMI to be used as a small SCADA system.
- Support multiple user levels and LAN clients, ensuring user control in several levels.

Application examples

Energy monitoring system - SEMS

Monitor, track and record your energy production and consumption to optimise and implement the energy awareness on board the vessel.

Alarm handling and monitoring

Monitor alarms, view historical alarm data, and acknowledge active alarms.

· Power management systems - control and supervision

The AGI communicates with all power management system controllers, giving you an essential and full overview of the application. This means you can manage the power management system from a single screen.

Graphical interface - mechanical and electrical systems

Interface with mechanical and electrical equipment for local overview. Trend measured values to monitor operational performance and find any faults in the system.

NOTICE

Compliance

Systems must comply with the guidelines of the classification societies.

1.2 Software

The AGI 400 M/MHB series uses the Linux RT operating system, and the platform has been designed to run the DEIF AGI software.

- Full vector graphic support. Native support of SVG graphic objects. Transparency and alpha blending.
- Full object dynamics: Control visibility and transparency, move, resize and rotate any object on screen. Change properties of basic and complex objects.
- TrueType fonts.
- Multi-language/alphabets and applications. Easily create and manage your applications in multiple languages to meet global requirements.
- AGI Creator supports easy third-party translations and help to reduce development and maintenance costs of the
 application, with its built-in language tools.
- Data display in numerical, text, bar graph, analogue gauges and graphic image formats.
- Rich set of state-of-the-art HMI features: Data acquisition, alarm handling, scheduler and timed actions (daily and weekly schedulers, exception dates), recipes, users and passwords, email and RSS feeds.
- Multiple drivers communication capability, see separate section in this document.
- Mobile and tablet compatible WEB server embedded, for easy mobile platform implementation.
- Remote monitoring and control. Client-server functionality. Mobile clients supported.
- Offline simulation with AGI Creator.
- Supports powerful CODESYS PLC runtime for automating HMI applications.
- · Rich gallery of industrial standardiser symbols and objects.
- Embedded own user gallery workspace for fast application development.

DATA SHEET 4921240679A EN Page 4 of 26

• PDF reader for on-screen user guide reading.

Application development support

- DEIF specific application templates, free of charge.
- DEIF importable communication setup files, compatible with a DEIF controller.
- DEIF graphics included, covering over 4000 DEIF specific graphical elements.
- DEIF templates include a fully customisable menu structure.
- AGI system setting, included in templates.

DATA SHEET 4921240679A EN Page 5 of 26

2. Functionality

2.1 Functionality

2.1.1 Remote access

The AGI 400 M/MHB series offers the following options to connect and control remotely:

Remote options available	
AGI Client - an MS Windows parallel client	YES (max. 4)
AGI WEB - tablet and smartphone access	YES, via configurable AGI web server
VNC server	YES
Email client with SSL	YES
FTP server	YES
MQTT	YES

2.1.2 Software functionality

User functionality	
Screen image orientation	Landscape 0°, portrait 90°, landscape 180° and portrait 270°
Multiple protocols	YES, please see protocol section
Data transfer between protocols	YES
RTC with NTP synchronisation	YES, with internal maintenance-free battery backup
Time scheduled tasks	YES
LED backlight off with custom timeout	YES
Screen saver with custom timeout	YES
Live trending curves	YES
Alarm handling	YES
Trend data logging	YES
Historical data logging and export to SD card/USB	YES (export trending)
Logging events (audit trails)	YES
Retentive memory	YES
Recipe handling	YES
Internal buzzer	YES
Industrial widgets	YES
Custom widget library	YES
PDF reports	YES
PDF reader	YES
User/access management	YES, local and client/remote
Multi-touch support	YES, swipe and pinch zoom
IP camera support	YES, monitor and control
HTML 5 web browser support	YES, based on web kit

DATA SHEET 4921240679A EN Page 6 of 26

TrueType fonts	YES, support multiple alphabets
SVG images	YES
Multi-language	YES
Object dynamics	YES, visibility, opacity, position, size, rotation
JavaScripting	YES
CODESYS runtime add on	YES, V3.5 (license needed to enable)

AGI Creator - application designer software	
Update project via USB memory	YES
Programming and updating over LAN	YES
Password protection of projects	YES
Upload from AGI and re-work project	YES
Simulation online/offline	YES
Import/Export TAG list	YES
Import/Export alarm list	YES
Converting existing application to newest version	YES
Language list	YES, import/export to spreadsheet file for translation

2.1.3 Maximum resources

Maximum resources available	
Number of pages	1000
Number of basic widgets/objects	2000 x page
Number of tags	10000
Number of dialogue pages	200 (max. 5 can be opened simultaneously)
Number of recipes	32
Number of parameter set for a recipe	1000
Number of elements per recipe	1000
Number of user groups	50
Number of users	500
Number of concurrent remote clients	4
Number of schedulers	30
Number of alarms	4000 (10000 AGI PC)
Number of data transfers	1000
Number of template pages	50
Number of actions programmable per button	32
Number of trend buffers	30
Number of tags per trend buffer	300
Memory reserved for trend buffer	50 MB (500 MB AGI PC)
Number of curves per trend widget	10
Number of curves per scatter diagram widget	10

DATA SHEET 4921240679A EN Page 7 of 26

Maximum number of trend table printable rows	10000 (50000 AGI PC)
Number of messages in a message field	1024
Number of languages	24
Number of events per buffer	10000
Number of event buffers	4
JavaScript file size per page	64 KB
Size of project on disk	240 MB
Number of indexed instances	100
Number of indexed alias	100
Number of indexed tag sets	30
Number of physical protocols	8
Number of reports	64
Number of report pages	32
Maximum number of variables in variables widget	255
User folder size	100 MB
User folder size (UpdatePackage.zip)	5 MB
Number of concurrent FTP sessions	4
FTP additional folders	5

DATA SHEET 4921240679A EN Page 22 of 26

Operating temperature	Vertical installation: -20 °C to +60 °C With plug-in modules and USB devices: -20 °C to +50 °C	
Storage temperature	-20 °C to +70 °C	
Operating and storage humidity	5 % to 85 % RH, non-condensing	
Vibration	IEC 60068-2-6 and IACS UR E10 2 to 13.2 Hz ±1 mm 13.2 to 100 Hz 0.7 g	
Shock	IEC 60068-2-27, test Ea 50 g 11 ms	
Protection	IP66 (front) IP20 (rear) According to IEC/EN 60529	
Dimensions		
Faceplate A × B	552 × 347 mm (21.7 × 13.66")	
Cutout C × D	541 × 336 mm (21.3 × 13.23")	
Depth E + F	56 + 8 mm (2.20 + 0.33")	

Approvals

Standards		
CE		
UCKA		
UL/ULC Listed to UL61010-1 / UL61010-2-201		
DNV		

^{*} Time of continuous operation until the brightness of the backlight reaches 50 % of the rated value when the surrounding air temperature is 25 °C. Extended use in environments where the surrounding air temperature is 40 °C or higher may degrade backlight quality/reliability/durability.
