

Insulation Monitor, AAL-2

Insulation monitoring of your AC networks

The AAL-2 is used to supervise insulation resistance between an isolated AC voltage distribution network and an earth/safety cable.

The insulation monitor is applicable with single-phase and 3-phase networks with/without neutral for voltages up to 440 V AC.

The AAL has a built-in relay output and an adjustable warning set point.

AAL-2 features

- ▶ Insulation monitoring of AC networks of up to 440 V AC
- ▶ 10 M or 1 M ranges
- ▶ Adjustable warning set point
- ▶ Delay to prevent unwanted warnings

AAL-2 type approval
