Subject:.DEIF MVR200 protection relay - approval for use as MV protection for consumers

After learning the technical data of the device, we approve the use of MVR200 protection relay in customers MV installations with clarifications as follows:

1. Use of MVR200 will be upon manufacturer instructions and recommendations only.
2. The consumer will determine the exact model of the relay according to the characteristics of the facility.
3. It is hereby clarified that the above does not impose on the Electric Company legal and / or professional and / or other liability and the above does not constitutes a substitute for the requirements of any relevant law and / or standard.
4. It is further clarified that the contents of this letter are correct and valid only at the date of its issuance.

The final approval for installation in customer facilities will be given by the Development of Grid Technologies.
