Electronic Potentiometer, EPN-110DN

Manual or automatic control of electronic speed govenors

The potentiometer converts the relay output of a PI step controller to a control voltage for the speed governor/ AVR, including DEIF's load sharing unit type LSU, DEIF's synchronisers type FAS, or any other type of PI step controller with relay.

EPN-110DN features

► Control of electronic speed governors

► Setting of integrating time

► Adjustment of output signal

► Offset adjustment

► LED indication for activated input

► 35 mm DIN rail or base mounting

EPN-110DN type approval
