# 1. Series 300

## 1.1 About the hardware modules

The hardware modules are printed circuit boards that slot in to either a R7.1 or R4.1 rack. Depending on the type of module, they can provide AC or other measurements, inputs, outputs and give communication indication.

### Controller racks

Modules  
1 PSM3.1  
2 module selection  
1 PCM3.3

Modules  
1 PSM3.1  
5 module selection  
1 PCM3.3

### Extension racks (EtherCAT)

Modules  
1 PSM3.2  
3 module selection  
1 small blind module

Modules  
1 PSM3.2  
6 module selection  
1 small blind module

The hardware modules feature:

- Placement flexibility in the rack.
- Add, replace, or remove on-site.
- Automatically recognised.
- Configurable input and output functions (digital and analogue):
  - Digital input functions: Commands from operators or 3rd party equipment, changing configuration, operating information.
  - Digital output functions: Alarm status, commands to 3rd party equipment, operating information.
  - Analogue input functions: External set points, operating information, supervised binary inputs.
  - Analogue output functions: Regulation \*, operating information.

**NOTE** \* Only available on certain types of controller.

All slots must be covered during operation and blind modules can be used to cover unused slots.

## 2. Technical specifications

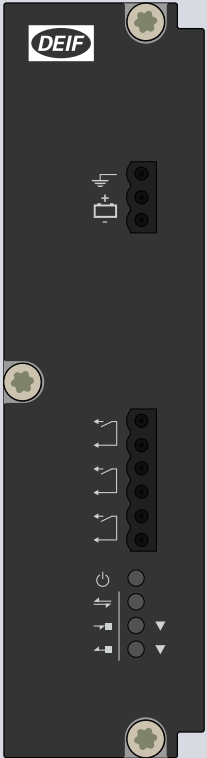

### 2.1 Power supply module PSM3.1 (Controller)

The power supply module provides power to all hardware modules in the rack. The rack status and alarms activate the three relay outputs. There are two ports for internal communication (EtherCAT) only with extension racks.

The PSM3.1 must to be powered by a power supply with Power Boost function.

The PSM3.1 manages the hardware module self-checks for the rack and includes a power LED. The power supply terminals include circuit protection against load dump transients and JEM177 surge transients (rugged design). These terminals also include battery voltage measurement.

#### PSM3.1 terminals

Module	Count	Symbol	Type/Info	Name
	1		Ground	Frame ground
	1		12 or 24 V	Power supply
	3		Relay output	1 × Status OK (fixed) 2 × configurable
	1		<ul style="list-style-type: none"> <li>● <b>Off</b> : No power supply</li> <li>● <b>Red flash</b> : PSM is starting or module failure</li> <li>● <b>Green</b> : Power supply</li> <li>● <b>Green flash</b> : Controller identification</li> </ul>	Power supply indication
	1		<ul style="list-style-type: none"> <li>● <b>Off</b> : No EtherCAT communication</li> <li>● <b>Green</b> : EtherCAT Communication</li> </ul>	EtherCAT communication connections (to connect to extension racks).  LEDs are on the module front, connections are at the module bottom.
	1		EtherCAT communication (RJ45) input <ul style="list-style-type: none"> <li>● <b>Off</b> : No communication</li> <li>● <b>Green</b> : Communication connected</li> <li>● <b>Green flash</b> : Active communication</li> </ul>	
	1		EtherCAT communication (RJ45) output <ul style="list-style-type: none"> <li>● <b>Off</b> : No communication</li> <li>● <b>Green</b> : Communication connected</li> <li>● <b>Green flash</b> : Active communication</li> </ul>	

#### PSM3.1 technical specifications

Category	Specification
<b>Frame ground</b> 	Voltage withstand: ±36 V DC to the power supply positive (terminal 1) and negative (terminal 2)
<b>Controller power supply</b> 	Input voltage: 12 or 24 V DC nominal (8 to 36 V DC continuously) UL/cUL Listed: 10 to 32.5 V DC 0 V DC for 50 ms when coming from at least 8 V DC (cranking dropout) Consumption: Typical 20 W, maximum 35 W Voltage measurement accuracy: 0 to 30 V: ±1 V; 30 to 36 V: +1/-2 V Internal protection: 12 A fuse (not replaceable) (fuse size determined by load dump requirements) Voltage withstand: ±36 V DC Load dump protected by TVS diodes

Category	Specification
	<b>Start current</b> <ul style="list-style-type: none"> <li>Power supply current limiter <ul style="list-style-type: none"> <li>24 V: 4 A minimum</li> <li>12 V: 8 A minimum</li> </ul> </li> <li>Battery: No limit</li> </ul>
<b>Relay outputs</b> 	Relay type: Solid state Electrical rating and UL/cUL Listed: 30 V DC and 1 A, resistive Voltage withstand: ±36 V DC
<b>Terminal connections</b>	<b>Frame ground and power supply:</b> <ul style="list-style-type: none"> <li>Terminals: Standard 45° plug, 2.5 mm<sup>2</sup></li> <li>Wiring: 1.5 to 2.5 mm<sup>2</sup> (16 to 12 AWG), multi-stranded</li> </ul> <b>Other connections:</b> <ul style="list-style-type: none"> <li>Terminals: Standard 45° plug, 2.5 mm<sup>2</sup></li> <li>Wiring: 0.5 to 2.5 mm<sup>2</sup> (22 to 12 AWG), multi-stranded</li> </ul>
<b>Communication connections</b>	EtherCAT communication: RJ45. Use an Ethernet cable that meets or exceeds the SF/UTP CAT5e specifications
<b>Torques and terminals</b>	Module faceplate screws: 0.5 N·m (4.4 lb-in) Connection of wiring to terminals: 0.5 N·m (4.4 lb-in) UL/cUL Listed: Wiring must be minimum 90 °C (194 °F) copper conductors only
<b>Galvanic isolation</b>	Between power supply and other I/Os: 600 V, 50 Hz for 60 s Between relay groups and other I/Os: 600 V, 50 Hz for 60 s Between internal communication ports and other I/Os: 600 V, 50 Hz for 60 s
<b>Ingress protection</b>	Unmounted: No protection rating Mounted in rack: IP20 according to IEC/EN 60529
<b>Dimensions</b>	L×H×D: 43.3 × 162 × 150 mm (1.5 × 6.4 × 5.9 in)
<b>Weight</b>	331 g (0.7 lb)

## 3. Legal information

### 3.1 Disclaimer and copyright

#### Open source software

This product contains open source software licensed under, for example, the GNU General Public License (GNU GPL) and GNU Lesser General Public License (GNU LGPL). The source code for this software can be obtained by contacting DEIF at support@deif.com. DEIF reserves the right to charge for the cost of the service.

#### General warranty

The warranty period for the purchased product is defined in the contract and order acknowledgement. In general, DEIF's Terms and Conditions of Sale and Delivery apply.

The product continuously monitors the operating temperature and stores this information in a log file on the device. DEIF uses this information for service purpose and to validate if issues with the product are covered by the warranty.

The software packages supplied are believed to be of the highest quality. Due to the nature of the software development process, it is possible that there are hidden defects in the software which may affect its use, or the operation of any software or device developed with this software package.

DEIF does not undertake responsibility for determining whether this package is suitable for the application, nor for ensuring the correct operation of the application software and hardware.

The warranty does not cover product wear parts, such as:

- Internal flash disc
- If applicable, SD card (purchased separately)
- Replaceable coil-cell battery, used for the real-time clock (available as a spare part)
